

Installing R and RStudio on your laptops

Step 1: Download and Install R

- a) Go to <http://cran.rstudio.com>
- b) Click on "Download R for (Mac) OS X" or "Download R for Windows" (depending on the operating system you're using)
 - b1) If you clicked on "Download R for Windows", in the following page choose "base", and then "Download R 3.2.3 for Windows".
 - b2) If you clicked on "Download R for (Mac) OS X", in the following page choose "R-3.2.3.pkg" and save the file
- c) Open the file you just downloaded and follow the instructions

Step 2: Download and Install RStudio

- a) Go to <http://www.rstudio.com/ide/download>
- b) Click on the button that says "Download RStudio Desktop" (around the middle of the page)
- c) On the following page, click on one of the two following links:
 - c1) If on a Windows laptop, click on "RStudio 0.99.491 - Windows Vista/7/8/10"
 - c2) If on a Mac laptop, click on "RStudio 0.99.491 - Mac OS X 10.6+ (64-bit)"
- d) Open the file you just downloaded and follow the instructions. In Mac OS X, make sure you drag the "RStudio" icon onto the Applications Folder in the window that appears after opening the file.
